---

## Summary

I am a passionate Web Developer skilled in creating responsive front-end applications using React, Tailwind CSS, and JavaScript, with experience in full-stack projects utilizing Node.js and MongoDB. I thrive on solving complex problems, delivering user-centric solutions, and staying updated with the latest technologies. My goal is to grow as a Full-Stack Developer and contribute to impactful, innovative projects in the tech industry.

## Technical Skills

- **Front-End:** React.js, Tailwind CSS, JavaScript (ES6+), HTML5, CSS3, Responsive Web Design (Mobile-first approach), Tanstack Query, Firebase, React Router.
- **Back-End:** Node.js, Authentication with JWT, OAuth.
- **Database:** MongoDB, MySQL (basic knowledge).
- **Tools:** Visual Studio Code (VS Code), GitHub, npm (package managers), Figma, Vercel, Netlify.

## Interpersonal Skills

- Active Listening, Effective Communication, Time Management, Team Collaboration & Teamwork, Adaptability & Flexibility, Leadership & Team Leading, Strong Work Ethic & Responsibility, Patience & Persistence.

## Projects

- **Web Development Blog Website** (A Blog Website)

### Features:

- **Dynamic Blog Management System:** Users can create, edit, and delete blogs, each including a title, image, category (dropdown), short description, and long description.
- **Commenting and User Interaction on Blog Details:** Users can comment on blogs, with each comment linked to the user's profile (including profile picture and name).
- **Prevent Self-Commenting:** Users cannot comment on their own blog; a message like "Cannot comment on your own blog" is shown.
- **Real-Time Data and Dynamic Content Display:** The application fetches blog data from the server dynamically, ensuring up-to-date content display on pages like All Blogs, Featured Blogs.

**Technology used:** React.js, Tailwind CSS, React Router, Firebase, MongoDB, Tanstack Query, Axios

- **Chill-Gamer** (A Game Review Website)

**Features:**

- **Comprehensive Review Management System:** Users can add, edit, and delete game reviews, including detailed fields like game title, cover image, review description, rating, genre, and publishing year.
- **Game Watch List Feature:** Users can add games to a personal watch list directly from the review details page. The Game watch list is presented in a table format, displaying game-specific details .
- **Dynamic Home Page with Featured Content:** Highlights the "Highest Rated Games" section by displaying at least six top-rated games fetched dynamically from the database

**Technology used:** React.js, Tailwind CSS, React Router, Firebase, MongoDB, Tanstack Query

## Educational Background

- **Institute of Science and Technology**  
Bachelor of Science in Computer Science and Engineering  
Session: 2019-2020
- **Sheikh Borhanuddin Post Graduate College**  
Higher School Certificate ( HSC )  
Session: 2018

## Hobbies

- Traveling and exploring new cultures.
- Listening to diverse music.
- Cooking and trying new recipe.

## Interests

- Exploring new technologies and trends.
- Designing user-friendly interfaces.
- Learning new programming languages

## Languages

I am proficient in the following languages, which helps me communicate effectively in both professional and personal environments:

- Bangla: Native.
- English: Fluent.
